

PROJECT DEVELOPMENT

Our Project Development service offering focuses on aspects determining the potential of the set project, this service is typically employed during the feasibility phase. The tasks encompassed by this service offering are:

- ✓ Identifying sites and/or project locations.
- ✓ Determining the energy load/demand.
- ✓ Mapping the project out in order to establish the available energy resource whilst determining the requirements for transmission and connections.
 - This is structured with stringent adherence/compliance to localised regulations and standards.
- ✓ Sizing of the renewable energy system.
- ✓ A multi-level skilled/qualified team, to be tasked with the overall implementation and execution of the project, is assembled.
 - Each position within the team will have clearly defined roles and responsibilities in order to facilitate and champion the project.
