

SOLAR PHOTOVOLTAIC (PV) TECHNOLOGY AND INNOVATION IMPLEMENTATION

Scorch Technology provides the complete commission of Solar PV systems. Our process is comprehensive including surveying, designing, installation and maintenance of systems. These installations are done by registered, trained and accredited installers.

To ensure compliance with international industry standards, our projects are supervised by PV Green Card holders. This allows us to meet minimum internationally benchmarked quality and safety standards and adhere to regulations and codes.

- ✓ C&I and EPC services are available.
- ✓ The business-to-business (B2B) relationships we have with our suppliers enable us to affordably conduct all the procuring of core equipment and the bill of plant (BOP).
- ✓ With a highly proficient technical team, we offer installation services solely as well, for both new and existing solar plants.
- ✓ We have the expertise and experience to offer consultation and inspection services in the field/on-site.
